Moom For Mac

Moom 's mouse controls optionally include a grid that lets you resize and move windows by dragging your mouse across its segments.. (The window isn't resizable anyway) Compatibility: OS X 10 7 or later One of the more frustrating aspects of macOS is the lack of an official window management tool.. Click in the empty box below the pop-up palette, move the mouse to where you'd like the window to be, then click-and-drag out its new dimensions.

...it's a snap!Want to quickly move and zoom windows to certain areas of the screen? Just enable Moom's Snap to Edges and Corners feature.. Quickly fill the screen, or move and resize to vertical or horizontal halves on screen edges.. Resolved a possible issue relating to macOS Catalina's Sidecar feature that was affecting a few users.. Want quarter-size windows instead? Hold down the Option key, and the palette presents four quarter-size corner options, along with 'center without resizing.. i put this in my "to evaluate" list years ago, after hearing about it on a podcast- but, because i'm a huge procrastinator, didnt try in until a few days agoi have waisted *so much* time of my life worrying about sizing windows "just right" to fit my eccentric work habits- my experience told me that no app could *ever* get close to satisfying my obsessive, OCD-like need for pixel-perfect alignmenti'm here to tell you that MooM (i like that spelling) fits my need perfectly, and i'm using only a fraction of its capabilitiesif you are meticulous about your window-based working environment, no matter how idiosyncratic, MooM is the app for you- hurry, give these fine people the pittance they're asking for the app (or try the demo first, you'll pay)i wish i had evaluated this app a long, long time agofolks, this app represents everything that Mac development is all about:- great attention to detail- clean interface- powerful, yet easy to use- delightfulworking on my Mac has become even more enjoyable, something i though could not be possiblei dont write eloquent reviews like this one often- it gives me great joy to pen (type) this oneMoom: Bringing order to chaos since 2011Moom makes window management as easy as clicking a mouse button—or using a keyboard shortcut, if you're one of those types of people.
